

AUTOMATIC COILERS

French specialist in the
field of automatic coilers

Complies with
international regulations

Reliability,
performance and flexibility

MECASOFT'S COILERS

Mécasoft's automatic coilers possess one or two reels to make a perfect coil depending on your production and the different dimensions that you need.

Every single part of the coiler comes from French or German suppliers who allow us to build a reliable coiler who can run through many years!

The lifetime is guaranteed due to the use of steels from the first choice material related to appropriate treatments.

Easier to use and to maintain, the mechanism is simple and functional. It allows space for your technician to work safely.

DETAILS

- + From 12 to 250mm diameters, we are able to propose the fitted coiler for your production!
- + Corrugated or smooth pipe, we are able to coil all your products!
- + Our products can run up to 100 meters/min!
From 160 to 1520 mm for the inner diameter!

OTHER EXTRUSION LINE EQUIPMENTS

- Automatic coupling fitting machines for pipe bars from Ø50mm to Ø250mm.
- Semi-automatic twine insertion devices.
- Pipe inspectors.
- Pipe winders and unwinders for high length stored in octabin form.

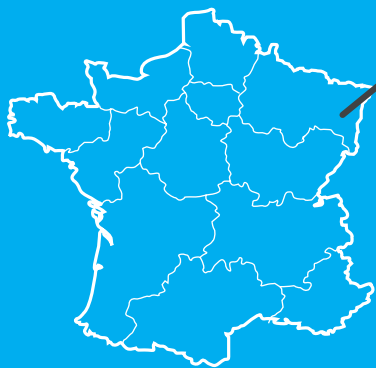

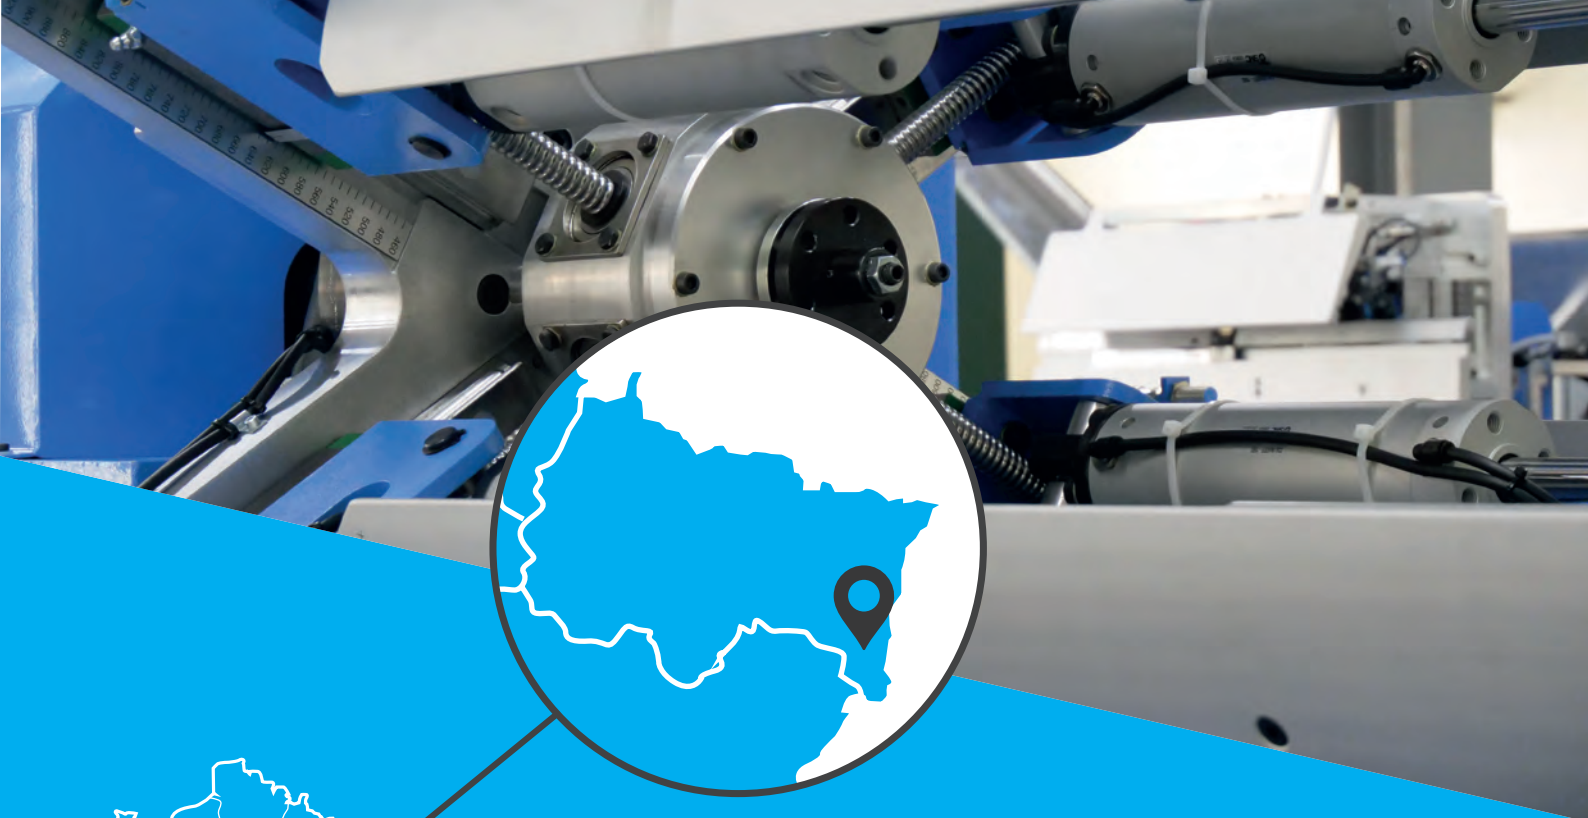

COILING TO PERFECTION

Strong and rigid construction allowing for precision and durability, associated with numeric control and sophisticated bug-free software for fine process control are necessary ingredients permitting in-line continuous production of perfectly coiled rolls of plastic pipe.

Low maintenance and ease of use are other much appreciated characteristics of mécasoft automatic coilers.

OPTIONAL COILER EQUIPMENTS

- + Central adjustment for quick diameter changing
 - + Remote access for distant intervention
 - + Twine insertion device on ED coilers
 - + Pipe cutting in wave trough on ED and ES coilers
 - + End caps fitting on EDL and ESL coilers
 - + Double strapping unit for intermediary straps on EDL coilers
 - + Automatic labeling devices
 - + Stretch film over-packing
 - + Coils collecting trolleys, swiveling jobs and conveyors
 - + Automatic palletization
- 

Located in the economic heart of Europe, Mécasoft is specialized in the production of automatic coilers and related plastic extrusion equipments since 1985.

The reliability, performance and flexibility of our machines as well as the responsiveness of the after-sales service have built up the company's reputation through the years.

Standard or customized, a Mécasoft product will improve your production process with sustained profitability and safety.
